

## **PILLARS OF COMMUNITY ENGAGEMENT**

As part of our local community engagement strategy we have identified 3 major community issues in which to participate and focus attention, as below:

1. Youth suicide
2. Drug and alcohol addiction
3. Family and domestic violence

We have a number of community advocates who will be working with local organisations to improve the lives of families and individuals in their respective T/O groups. Our key people will be visiting families and homes in the Roebourne, Karratha and South Hedland communities. We have identified several families who will qualify for support and assistance provided by the programme. This will include counselling/mediation and rehabilitation services for family members, identification of work ready requirements for young people and identification and resolution for at risk children. The programme will also provide support with home improvements, purchase of new appliances and general household goods.
